

2014 Message from the Air Force Personnel Center Physician Education Branch Chief

Air Force USUHS Applicants,

As you begin the application process for residency training, I want to congratulate you for your accomplishments and welcome you to the Medical Corps (MC) within the Air Force Medical Service (AFMS). The MC is one of five Corps within the AFMS with the other four being Dental (DC), Nurse (NC), Biomedical Sciences (BSC) and Medical Service (MSC). As members of the USUHS, you are Second Lieutenants in the MSC but will soon be Captains in the MC upon graduation from medical school! You are among the best and brightest medical students in our nation, and we are proud that you have chosen to serve in the Air Force. The Air Force Personnel Center (AFPC) Physician Education Branch stands ready to assist in any way we can to help you make the best decisions about your AF medical career.

Every year, the AF projects how many physicians in each specialty are required to meet the needs of the AFMS. This process, called "forecasting", is completed each year by the Health Professions Education Requirements Board (HPERB). The number of physician training requirements forecasted for each specialty is posted on our web page. These are the positions that will be selected at this fall's Joint Service Graduate Medical Education Selection Board (JSGMESB). As is the case in the civilian match, some specialties are more competitive than others.

The attached application instructions are very complete. Please read them thoroughly prior to beginning your GME application. I would like to highlight a few issues regarding the application process.

- ❖ You are responsible for submitting all application documents into the Medical Operational Data System (MODS). Please see our website for directions on how to upload your documents into MODS. Do not mail or email any documents to Physician Education!
- ❖ AFPC Physician Education **will not** have an extended call for applications beyond **14 September**. **Please ensure you meet the deadlines and have all required documents uploaded into MODS by 14 September.**
- ❖ **JSGMESB deadlines are firm.** MODS will be closed after 14 Sept and your application will not meet the JSGMESB if your application is incomplete. Scanned or mailed hard copy applications will not be accepted. It is your responsibility to meet the deadlines.
- ❖ If you are selected for GME, you must meet all conditions prior to beginning GME. Those conditions include passing USMLE Step/COMLEX Level 1 and 2, graduating from medical school, passing your AF Fitness Test, etc.
- ❖ For previous JSGMESB applicants, due to automation processes, AFPC Physician Education requires you upload new copies of Dean's letters, transcripts and USMLE/COMLEX scores into MODS. Even if you sent copies in previous years, you are responsible for obtaining a copy of these items and uploading them into MODS. Members are encouraged to maintain copies for their personal files for future use and any future GME applications.
- ❖ Applicants must apply to, and be selected by, the 2014 JSGMESB to enter a GME program. The training opportunities available at the JSGMESB are specific in terms of the number of training years, locations, and funding. Active duty service commitments (ADSC) will vary according to the type of funding (AD program, civilian sponsored or civilian deferred) and the existence of previously incurred educational ADSC. Applicants may not seek residency training that contains an MPH curriculum.
- ❖ You must complete an interview (preferably in person) with one active duty (AD) AF Program Director in the specialty you are applying, regardless of whether you are applying for an AD or civilian sponsored GME program. Please be reminded USUHS students are not eligible to rank training in civilian deferred status for residency GME unless authorized by the Physician Education Branch Chief and under exceptional circumstances. A request to rank training in a civilian deferred status must be submitted to the Branch Chief through your Physician Education Program Manager with justification of the exceptional circumstances for your request. Final approval for civilian deferred training will be made by the JSGMESB President.
- ❖ AF Program Directors/Consultants may only review a copy of your Department of Defense (DoD) application and curriculum vitae (CV). They may not request additional materials such as photographs, essays or letters of recommendation.
- ❖ In addition to applying to the JSGMESB, it is mandatory that all USUHS medical students who are applying for a civilian sponsored position must apply through the civilian matching program. You should enter the National Residency Match Program Electronic Residency Application Service (ERAS) for residency training in your specialty of choice. If selected for training in an AD program by the JSGMESB, you must withdraw from the civilian match. The AF requires students to enter the civilian match to ensure they can train in a civilian institution if they are selected by the JSGMESB for training in civilian sponsored status. You will apply through ERAS at the same time you are submitting your JSGMESB application to this office. Do not delay applying through ERAS! Late applicants may have to pay late entrance fees.
- ❖ Due to the competitive nature of the JSGMESB, even though you apply for categorical residency training on your JSGMESB application, you could still be selected for an AD PGY1 internship in Internal Medicine, General Surgery or a Transitional year. The JSGMESB is a competitive board and your order of merit will determine your selection at the JSGMESB.
- ❖ When applying for civilian sponsored training and interviewing with civilian programs, you should provide a copy of the AFIT Training Agreement (TA), in advance, to the prospective civilian institution, to ensure they can agree to the terms and to prevent later delays in

processing your GME assignment. Please direct any questions regarding the content of the TA to the AFIT POC listed on the first page of the agreement. The AFIT TA can be found on the AFPC Physician Education website.

- ❖ Civilian programs under the jurisdiction of LA County (LAC)/Univ of Southern California require a separate Training Affiliation contract, in addition to the AFIT TA. Please refer to page 6 Civilian Sponsored Training, paragraph c, for additional administrative guidance.
- ❖ You must adhere to AF fitness standards. If you have an unsatisfactory score, this may impact your ability to compete for your specialty choice in residency training. The JSGMESB President will review all “unsatisfactory” fitness applicants and approve selection for GME on a case by case basis.
- ❖ All medical student applicants must rank order all AD training location preferences in the specialty to which they are applying since AD training sites are filled prior to approval of civilian sponsored training. This assures that your AD location preferences are available to JSGMESB panel members.
- ❖ If you are not selected for the specialty of your choice, you will be approved to enter a PGY1 only internship in Internal Medicine, General Surgery or a Transitional year. You may re-apply to the **2015** JSGMESB for specialty training beginning in **2016** or you may serve an operational tour in Flight Medicine after completing your PGY1 year.
- ❖ You will receive an email checklist each time there is an administrative update or change with your application, such as when you upload new documents into MODS. Review the checklist carefully for accuracy. Do not reply to the email checklists as they will be automatically deleted.
- ❖ All AFHPSP applicants must complete an active duty tour (ADT) at one of the AF’s teaching facilities. The AD tour in a clinical internship/specialty enables you to meet the JSGMESB interview requirement. To meet this requirement, ensure you schedule an interview with the Program Director during your ADT. All interviews must be completed no later than **10 October 2014**. AF Program Directors may only review a copy of your DoD application and CV. They may not request additional materials such as photographs, board scores, essays, or letters of recommendation.
- ❖ All medical students must have a security clearance prior to entering residency training. Physician Education will contact you if you are required to initiate a security clearance.
- ❖ Physician Education will no longer accept individual copies of the USMLE Step 1 or Step 2 CK/CS exam scores from the NBME. You will be required to upload into MODS a copy of the original of your official transcript from the NBME showing all Step 1 and 2 current exam dates and scores.
- ❖ GME selection for categorical residency training is contingent upon successful completion of USMLE Step 1 and 2 tests and successful completion of all medical school requirements. Your GME offer is valid until your official anticipated medical school graduation date. GME offers may be withdrawn for students requiring extensions in medical school graduation date.
- ❖ Ensure your email address is current as we will be emailing your **2014** JSGMESB selection letters to you no later than 31 January **2015**.
- ❖ Please read the application thoroughly as all instructions are within the application. If after searching the application, you have additional questions, please contact your Physician Education Program Manager for assistance. Again, please review the application first before contacting your Program Manager. Please refer to the application page number related to your question when contacting the Program Manager.
- ❖ If you are selected for AD GME training, reporting prior to your authorized report date on your AD orders is not permitted.
- ❖ The last day for requests for training location changes is **15 Oct 2014**. All requests must be submitted via email to Physician Education and on the second page of the DoD application for GME (DPANE Form 4117), 2nd Choice form or the PGY1 only form, as applicable. No changes will be made by telephone. Change requests must be received by Physician Education no later than **15 Oct 2014**.

These remarks are meant to highlight some key points. There is additional detailed information in the instructions accompanying the application forms. In addition, we have teamed with the AFPC Total Force Service Center (TFSC) to provide 24/7 assistance via their telephone line. You may contact them at 800-525-0102 for application assistance. For additional assistance, you may contact my staff at DSN 665-2638, 210-565-2638 or 800-531-5800. The AFPC TFSC and my Program Managers stand ready to assist you with your application. I wish you the best with your application and your future GME training endeavors!

JSGMESB Checklist for Success

This checklist outlines all documentation required to complete the JSGMESB application. Please review the JSGMESB Overview and Application Guidance sections for detailed explanations/instructions on each requirement. All application documents **MUST** be typed and uploaded into MODS (**fax/email/hard copy documents will not accepted**).

The following documents are due 14 September 2014 and must be uploaded into MODS by the applicant

1. _____ DoD two-page application for GME (DPANE Form 4117)
2. _____ CV
3. _____ Three personal letters of recommendation (the Chair letter must be from a civilian or military physician in the department of your first choice of residency)
4. _____ Personal essay
5. _____ Second choice form
6. _____ Commander's fitness statement
7. _____ Statement of understanding
8. _____ Education Summary
9. _____ PGY1 only

The following documents must be uploaded into MODS NLT 15 Oct 2014:

- _____ USMLE Steps 1 and 2 (copy of original board transcript)
- _____ Program Director/Consultant interview sheet (complete your interview by **10 Oct 2014**; PDs/Consultants will upload the interview sheet into MODS)

The following documents must be uploaded into MODS NLT 7 Nov 2014:

- _____ Medical student performance evaluation (MSPE, formerly known as Dean's letter)
- _____ Official copy of medical school transcript

Section 1: JSGMESB Overview

USUHS Graduate Medical Education (GME) Application

Please read all instructions prior to completing any part of the application package. Compliance with these instructions will expedite the processing of the application and afford the opportunity for GME selection.

Training Opportunities

The Health Professions Education Requirements Board (HPERB) convened 20 May 2014 and identified GME training opportunities based on AF requirements. Only apply for training in specialties that have training requirements identified. If a desired specialty is not listed in the HPERB results, do not submit a GME application for that specialty. If an application is uploaded into MODS for a specialty not identified in the HPERB results, the application will be not be considered by the JSGMESB.

An applicant may not enter GME (this includes extended training such as RESEARCH) unless he/she has applied to and has been approved for training by the JSGMESB. The results of the HPERB indicate a specific start year for training. Some training is approved two years in advance. Please pay particular attention to the specific start dates identified by the HPERB.

Applicants applying for HPERB-approved civilian sponsored training must request training in specialties reviewed and approved by the Accreditation Council for Graduate Medical Education (ACGME). Applicants are encouraged to review the American Medical Association's FREIDA Online. Applicants may not apply for dual programs (e.g. Med/Peds) not approved by the HPERB. A copy of the HPERB results is posted at <http://www.afms.af.mil/physicianeducationbranch/index.asp>.

It is mandatory that all applicants enter the National Residency Match Program. If selected for a military GME program, applicants must withdraw from the match. The JSGMESB release date is **17 December 2014**.

Applicants must understand that if selected for training, the training will begin and end at the same training institution. Requests to divide training between two or more facilities (whether it is a request to PCS or the member's offer to pay for moving expense) will NOT be approved.

Applicants must rank ALL active duty (AD) GME programs in which the HPERB has authorized training for the respective specialty in which applying (e.g. Internal Medicine applicants MUST rank SAUSHEC, Wright-Patterson/Wright State, Keesler and David Grant/UC Davis on page two of the DoD application for GME).

USUHS individuals are required by contract to submit a GME application to the JSGMESB. If you are a USUHS student and you fail to submit an application it may result in your benefits being suspended. Failure to submit an application may result in the consideration for a PGY1 only year.

Active Duty Military Training

Per US Code, Title 10, the postgraduate year-1 (PGY1) year in an AD program does not incur an active duty service commitment (ADSC). However, applicants are reminded that individuals selected for AD military programs incur an ADSC for the length of training, year-for-year (remember an initial PGY1 does not incur an ADSC), to be served concurrently (i.e. at the same time) with the remaining USUHS commitment. For a USUHS student, there are no instances where the ADSC for a residency program is longer than the existing ADSC from USUHS (e.g. 4-year USUHS student with a 7 year ADSC who is selected for a 6-year

cardiothoracic surgery residency with a 5 year ADSC would serve the 7 year ADSC for USUHS and the 5 year ADSC for residency training at the same time with the USUHS ADSC being the longer of the two).

Civilian Sponsorship Training

a. Applicants selected for civilian sponsored training will continue in AD status, be assigned under the command of the Air Force Institute of Technology (AFIT), entitled to AD benefits and paid an AF salary. As such, time spent in civilian sponsored status will count toward time in service, time in grade, and promotion just as if the member was at a military facility. AD physicians are prohibited from receiving a salary, stipend, or other monetary benefits from the civilian institution for his/her services as a resident or fellow. DoD and AF instructions prohibit off-duty employment/moonlighting while in GME training regardless of the civilian institution's policy.

b. Applicants applying to ACGME accredited civilian training programs prior to the JSGMESB do not need an acceptance letter from the program as a part of their application. Individuals may negotiate with Program Directors prior to the JSGMESB but must make it clear to each Program Director that acceptance of any training offer is contingent upon official written notification by the AF following the JSGMESB. Applicants may seek programs in ACGME accredited civilian programs in the continental United States only. Final AF approval is contingent upon approval of the specific civilian training program including length and location of rotations away from the parent institution.

c. Applicants should provide a copy of the AFIT Training Agreement (TA), in advance, to the prospective civilian institution, to ensure they can agree to the terms and to prevent later delays in processing the assignment. Please direct any questions regarding the content of the TA to the AFIT POC listed on the first page of the agreement. If the applicant is selected to enter civilian sponsored training, the TA will need to be signed/executed between the AF and civilian institution. No TAs should be signed/executed prior to selection by the JSGMESB. The AFIT TA can be found on Physician Education website: <http://www.afms.af.mil/physicianeducationbranch/index.asp> **NOTE:** Programs under jurisdiction of LA County (LAC)/U of Southern Cal require a separate Training Affiliation contract (not the standard AFIT TA). This is a LAC requirement and is initiated by LAC. Legal coordination of this agreement can typically take weeks or months. Because of LAC's requirement, you will not be released for assignment until final disposition of this agreement is made. If you intend to apply to LAC programs, please keep in mind the timeframe in obtaining a signed LAC contract. Also, to avoid delays in assignment processing, ensure the appropriate individual has legal authority to sign contractual agreements. Often times, the Program Director may not have this legal authority.

d. Applicants selected for civilian sponsorship training starting in **2015** must provide an original letter of acceptance for that program by **10 April 2015**. Do not submit a letter of acceptance from more than one training facility. Letters of acceptance must be from the Program Director indicating the training specialty as well as the start and graduation date of training. Additionally, sponsorship TAs will also be due by **10 April 2015**. The TA will be provided by Physician Education to the applicant to send to the training facility. If Physician Education does not have a letter of acceptance and sponsorship training agreement by **10 April 2015**, the offer to enter training may be withdrawn.

e. Applicants who have been offered and have accepted civilian sponsorship are encouraged to seek positions in programs which have affiliations with Veterans Administrations facilities.

f. Per AFI 36-2107, Table 1, civilian sponsored training (residency/fellowship) incurs a consecutive ADSC (i.e. served after a previous ADSC has been fulfilled rather than being served at the same time as a previous ADSC) for each year of training. Three years sponsorship incurs three years of ADSC and so forth. This civilian

sponsored residency or fellowship ADSC is consecutive to the longest medical education/training ADSC the member has preexisting. In other words, you will begin fulfilling it AFTER your longest ADSC for medical education/training. Contrary to civilian sponsored training, residency training in an AD facility (AF, Navy, Army) incurs a year for year concurrent ADSC. As a reminder, no medical education/training ADSC may be fulfilled during GME training status. For future reference, AD fellowship ADSCs are consecutive to any remaining GME ADSC one has (e.g. residency ADSC.)

g. In some instances, a civilian program may offer you a “Good Faith” letter indicating that the program is willing to accept you if selected by the JSGMESB. This letter does not guarantee selection by the JSGMESB but does show you have an accepting program. You may submit the “Good Faith” letter to Physician Education to include in application.

Training in an Army or Navy Program

Training in an Army or Navy program requires funding from the AF. If the **2014** HPERB approved an Army or Navy facility as a training location, an applicant is able to request consideration for placement at that facility on page two of the JSGMESB application. If a specialty is soliciting civilian sponsorship as a training location and there is availability at an Army or Navy program, the applicant may request consideration for an Army or Navy program. However, the Army or Navy must be offering training in that specialty for the same year as approved by their HPERB-equivalent process. In situations where the HPERB did not approve an Army or Navy facility but did offer civilian sponsorship, it is the applicant’s responsibility to contact the respective Army or Navy Program Director to determine training availability and program capacity. If the HPERB did not approve placement in an Army or Navy program and if civilian sponsorship is not available to convert to an Army or Navy facility, then the applicant should not rank Army or Navy programs.

Again, applicants must rank all AD AF GME programs in which the HPERB has authorized training for the respective specialty in which applying (e.g. Internal Medicine applicants MUST rank SAUSHEC, Wright-Patterson/Wright State, Keesler and David Grant/UC Davis on page two of the DoD application for GME).

Off-duty Employment/Moonlighting

In accordance with the DoD Policy and AFI 44-102, 1.9.4, applicants are not authorized to moonlight during GME training. Obligated AF officers are required to comply with all DoD and AF regulations. In some instances these requirements vary from non-obligated AF peers. Physician Education has the authority to remove you from training in the event a member engages in off-duty employment/moonlighting during GME.

Entering the Civilian Match

You are required to submit an application through both ERAS and the JSGMESB.

In addition to applying to the JSGMESB, it is mandatory that all USUHS medical students who are applying for a civilian sponsored position must apply through the civilian matching program. You should enter the National Residency Match Program ERAS for residency training in your specialty of choice. If selected for training in an AD program by the JSGMESB, you must withdraw from the civilian match. The AF requires students to enter the civilian match to ensure they can train in a civilian institution if they are selected by the JSGMESB for training in civilian status. You will apply through ERAS at the same time you are submitting your JSGMESB application to this office. Do not delay applying through ERAS! Late applicants may have to pay late entrance fees and may have to scramble to find programs after the match is over with.

Due to the competitive nature of the JSGMESB, even though you only request an AD categorical residency training on your JSGMESB application, you could still be selected for an AD PGY1 internship in Internal Medicine, General Surgery or a Transitional year.

Active Duty Service Commitments (ADSC)

ADSC is governed by US Code, Title 10 and AFI 36-2107 and varies depending on the length of sponsorship. An ADSC cannot be fulfilled while in GME training and is calculated based on completion dates.

Individuals selected for AD programs incur a year for year ADSC after the initial internship year. The initial internship year in an AD program is ADSC neutral. This GME ADSC is served concurrent (i.e. at the same time) with the ADSC for USUHS. For a USUHS student, there are no instances where the ADSC for a residency program is longer than the existing ADSC from USUHS (e.g. 4-year USUHS student with a 7 year ADSC who is selected for a 6-year cardiothoracic surgery residency with a 5 year ADSC would serve the 7 year ADSC for USUHS and the 5 year ADSC for residency training at the same time with the USUHS ADSC being the longer of the two).

Similar to AD programs, civilian sponsored GME programs incur a year for year ADSC though the initial internship year is not ADSC neutral. In addition, a civilian sponsored ADSC is served consecutive (i.e. in addition to the previous ADSC). See the table below for GME residency examples.

Training Length Completion Dates

Type of training:	Military Program*	Civilian Sponsored**
Length of program:	(5 years)	(5 years)
Start date:	1 Jul 2014	1 Jul 2014
Graduation date:	30 June 2019	30 June 2019

Previous ADSC	Completion of ADSC	Completion of ADSC
USAF + USUHS 12 year ADSC	30 June 2031	30 June 2036
ROTC + USUHS 11 year ADSC	30 June 2030	30 June 2035
USUHS 7 year ADSC	30 June 2026	30 June 2031

Notes:

*Military GME does not incur a longer ADSC than the previous ADSC though GME ADSC served concurrent to a previous ADSC

**Civilian sponsored GME residency training incurs an ADSC served consecutive to a previous ADSC

1. If incurring a longer ADSC is a consideration factor for you, **DO NOT** rank programs that will result in extending your current ADSC date.
2. Ranking programs indicates you are willing to incur a longer ADSC as indicated above for the double asterisk scenarios.
3. If you rank and are selected for a training program approved by the JSGMESB, you will not be allowed to switch to another program after the JSGMESB.

Active Duty Tour (ADT)

All USUHS applicants must complete an ADT in the specialty of their first choice of residency training. This enables you to meet the JSGMESB interview requirement provided you interview with the Program Director during the ADT. If you change your specialty choice after your ADT you will need to complete an interview (preferably in person) with one AD AF Program Director in your new specialty choice no later than **10 October 2014**. Applicants applying to Radiation Oncology must interview with the AF Consultant as there is no AF AD program. For more information on the interview requirement please see the section below entitled Program Director/Consultant Interview Sheets.

Please make sure you schedule your ADT. We suggest you schedule this as soon as possible before the ADT training vacancies are filled.

Statement of Understanding

If selected by the JSGMESB, physicians will be required to work in a clinical capacity (in the specialty in which they trained) for at least two years after GME completion unless the AF/SG waives this requirement due to the needs of the AF mission.

“How Many Applications?” Question

Quite often Physician Education will receive the question “how many applicants, in my specific specialty, will be meeting this JSGMESB?” Physician Education does not release this information to applicants since the number is arbitrary in nature, and does not give a true sense of the applicant pool, number of waivers, eligibility, qualifications, quality of applications, etc. From an administrative standpoint, you are highly encouraged to make your application complete to ensure it is as competitive as possible. Also, make certain you meet all the administrative requirements as outlined in these application instructions and GME checklist.

Section 2: JSGMESB Application Instructions

Required Elements for the USUHS GME Application

Please read all instructions before completing any part of the application. Applicants must comply with all requirements if they wish to be considered for GME selection.

All elements of the GME application to be uploaded into MODS must be typed, single sided (**no front/back documents**) on plain bond paper. No handwritten documents will be accepted by the JSGMESB. All documents with the **14 September 2014** deadline must be uploaded into MODS.

General information

- a. If an applicant attended any previous training under a different name, please include the name in parenthesis on the DoD application form and the Curriculum Vitae.
- b. Submitted application materials are for JSGMESB and Physician Education use only. These items are considered board sequestered and copies will not be furnished to the applicant or any third party requestor. Please plan accordingly if/when applying to or accepting offers from civilian institutions that requires a separate application process. Applicants are reminded they should keep a copy of their application package. Physician Education will not provide applicants, interviewers or other agencies a copy.
- c. Please ensure the original, signed application is uploaded into MODS on or before **14 September 2014**. **Please do not delay in submitting an application as MODS will be closed for submission of these documents after 14 Sep 14.**
- d. **Faxed, emailed, mailed or hand-written DoD applications/supporting documents for the JSGMESB will not be accepted. Applications and ALL supporting documents must be uploaded into MODS with an original signature. There is no exception to this policy so, again, do not email, fax or mail any application item.**
- e. The required application documents not uploaded into MODS by **14 September 2014** will not be considered by the JSGMESB.
- f. This is a triservice GME selection board; all forms are standardized. When downloading from your email or the Physician Education website, do not change, alter, or deviate from the original format. Download and complete the application documents on your personal computer. Print the completed documents and upload the original, **signed** copies into MODS. Do not change the format of any forms or try to submit this application via email, fax or hard copy. Compliance with these instructions will expedite the processing of your application and afford the applicant the opportunity for selection for GME. All GME documents must be typed.

Contact Information

Applicants should notify Physician Education of any changes in contact information to ensure timely receipt of documents and application statuses. In order to expedite notifications and delivery, Physician Education sends electronic checklists to applicants regarding application status. The applicant is encouraged to include business and personal email addresses with the application to ensure timely receipt of notifications.

DoD Two-Page Application for GME (DPANE Form 4117)

- a. The applicant will receive an automated email checklist each time there is an administration change to the application (i.e., documents uploaded into MODS) by Physician Education. Do not contact our office unless

you have not received an automated email acknowledging receipt of your application package within two weeks of uploading it into MODS.

b. Supporting documents must be typed and printed on one side only on plain white bond paper and uploaded into MODS. Hand-written application will not be accepted. Some documents will be completed within MODS but all other documents must be uploaded by the applicant.

c. The two-page DoD application for GME (DPANE Form 4117) must be completed within MODS. It cannot be found on any other website. This form is being used by ALL participating services – Air Force, Army and Navy. You will be able to complete this application within MODS but will need to use the form in this application to send to Program Directors/Consultants.

d. USUHS applicants will complete items 1-15, 18, 21 and 23-24. Most items are self-explanatory. The following helpful hints are provided when completing your DoD Application for GME (DPANE Form 4117):

- You must include at least one valid email address in Block 10 and no more than three. All correspondence will be sent directly to all addresses listed.
- Block 12 – You may list only one specialty choice. The second choice form must be completed if you wish to be considered for a second specialty.
- If your GPA or school ranking is unknown, indicate UNK. The panel reviews Dean's Letters/transcripts for awarding points.
- Block 18 – Your application must contain copies of USMLE Steps 1 and 2. These scores are due no later than **15 Oct 2014**.
- Block 23 – Applicants must rank ALL AD GME programs in which the HPERB has authorized training for the respective specialty in which you are applying. Please see additional notes below regarding Block 23.

e. Block 23: Applicants are able to list training location preferences (***up to 6 choices only***). In order to be considered for a particular HPERB approved training location, the applicants must indicate their preference(s) in Block 23. You are required to rank order all AD training locations, if offered (e.g. Internal Medicine applicants **MUST** rank SAUSHEC, Wright-Patterson/Wright State, Keesler and David Grant/UC Davis on page two of the DoD application for GME). Applicants are reminded that AF programs have priority and are filled before offering civilian sponsorship. Despite an applicant's preference for civilian sponsored training, the AF may require that they train in an AF program. Do not choose locations that are not approved by the HPERB even if they may be available with the Army or Navy. Exception: see above section titled, "**Training in an Army or Navy Training Program**".

f. Block 23: Note the difference between applying for Civilian Sponsored and Civilian Deferred status:

1. Civilian Sponsored: If selected, you are on paid AD status while training in a civilian facility to which you have applied and been accepted. While sponsored, you will incur an additional ADSC which will be consecutive with any previously existing ADSCs. Your time in training does count towards retirement and for pay purposes, but you may not accept any salary from the training institution.
2. Civilian Deferred: Deferment in a civilian facility. USUHS students are not eligible for civilian deferred programs unless authorized by the Physician Education Branch Chief and under exceptional circumstances. A request to rank training in a civilian deferred status must be submitted to the Branch Chief through your Physician Education Program Manager with justification of the exceptional circumstances for your request. Final approval for civilian deferred training will be made by the JSGMESB President.

g. Personal photos are not authorized with the GME application and should not be uploaded into MODS.

Curriculum Vitae (CV)

The applicant is required to follow the GME format exactly. This application is meeting a triservice board and must be standardized. Please do not modify (i.e. change fonts/pitch, remove dividing lines, re-arrange sections, etc.) or your CV will be returned for corrections. **DO NOT DELETE ANY SECTIONS**, to include Spouse section (regardless of marital status). If a section does not apply, simply annotate “N/A”. The CV is located in Section 3. You may, however, create more space within a specific block if need be (e.g. adding lines for more military assignments).

Three Personal Letters of Recommendation

Letters must be original with original signature written and dated within 6 months of the application and limited to one page (to include signature block). The Chair letter must be from a civilian or military physician in the department of your first choice of residency. Please contact the USUHS Office of Student Affairs for information on how to obtain your chair letter at 295-3187. If you are applying for a PGY1 only, the Chair letter may be from any department. Letters from previous applications will not be used. Carefully consider who will submit a letter of recommendation. Do not submit more than three letters. Do not request more than three individuals to write letters and later request to “switch out” letters. All letters of recommendation must be uploaded into MODS and should not be received under separate cover. Thus, you will need to request the letters be sent to you so that you can upload them into MODS.

The author of the personal letter of recommendation must NOT be in any of these roles:

1. Person who is interviewing you for the specialty in which you are applying
2. Program Director or Associate Program Director in the specialty in which you are applying
3. Sitting AF Consultant of the specialty in which you are applying
4. Any member of the JSGMESB Management Level Review or Board President’s panel

If a personal letter of recommendation is received in your application package by any of the above individuals, it will be removed. There is no standard format for the personal letter of recommendation. The author may address the letter to the JSGMESB.

Personal Essay

Required from all applicants and must be no more than 1 page (**double spaced, Times New Roman, 10 or 12 font size, and 1 inch margins**). Ensure your name is included on the essay. The essay must be current. Physician Education cannot use essays submitted with previous JSGMESB applications. The board is greatly influenced by this essay. Using a four paragraph concept, outline personal/professional plans and goals, why you want to train in a particular specialty, and what strengths you bring to that specialty. If you have any extenuating circumstances for the JSGMESB to consider, communicate these in your last paragraph. Examples of extenuating circumstances include, but are not limited to, marriage to a member of the AF or another service; a spouse in a training program not affiliated with the AF (a statement from your spouse’s training program is required to substantiate their presence in the program); a parent with a terminal illness (medical documentation is required from the treating physician with the diagnosis and prognosis); and a family member enrolled in the EFMP/Special Needs program (documentation from the EFMP office required). You should also mention these circumstances during your program interviews and also email your Program Manager to bring their attention to your extenuating circumstance. Your personal essay is an opportunity to communicate with the JSGMESB- please use this to your advantage! ***Important: If you are listing civilian sponsored training as your first choice, when there are AD locations authorized by the HPERB, you must indicate your reasons for having***

civilian sponsored as your first choice. If there are extenuating circumstances, you must provide source documentation as mentioned above in the examples.

Second Choice Form

This form must be filled out by **all** applicants and requires the applicant's signature. Second choice refers to specialty choice only (e.g. your first choice is ophthalmology but, if not selected, your second choice is general surgery). The second choice start date and training preferences are indicated on the second choice form. If you list a second choice for specialty, please ensure you also fill out items 3-5 on the second choice form. If you do not have a second choice for a specialty, just check item 1 on the form ("I do NOT have a second choice...") and print/sign your name at the bottom of the form. Completion is mandatory. The JSGMESB is a competitive selection board so consider a second choice if your application includes items which might make you less competitive (e.g. failed Step exams, repeat of a medical school year for academic reasons, etc.). Talk candidly with the PD/Consultants in the specialty of your first choice about your competitiveness.

Commander's Fitness Statement

The Air Force fitness program was revised on 1 January 2010. AD members are required to test twice per year unless a 90 or higher score ("Excellent") is achieved. Please follow current fitness guidelines IAW AFI 36-2905 and your local procedures. Visit your Unit Fitness Program Manager if you have questions on fitness testing. The JSGMESB Fitness Statement must be a part of your application-do not submit a copy of your fitness scorecard.

Applicants in all fitness categories may apply for GME. The JSGMESB President will review all "unsatisfactory" fitness applicants and approve selection for GME on a case by case basis. All AD applicants with a "satisfactory" or "excellent" score are required to submit a current Fitness Statement (provided in section 3) which is signed by either the Unit Fitness Monitor or your Squadron or Group Commander indicating your latest test date and test score. Applicants must be current through the end of this year. If your next test expires before the end of the year, you must retest so that you are submitting a current score as a part of your application package prior to the 14 September 2014 JSGMESB application deadline. For individuals who are identified as "unsatisfactory" (score < 75) or failed one or more component(s) of the test, the Squadron or Group Commander (not the Unit Fitness Monitor) must complete the letter and make his/her specific recommendation for GME consideration. Please note: if selected for GME and your fitness status changes from "unsatisfactory" to "satisfactory or excellent" or from "satisfactory or excellent" to "unsatisfactory" prior to entering training, Physician Education must be notified with an updated Fitness Statement.

Statement of Understanding

Read, sign, and date this page. A signature is mandatory.

Education Summary

Data requested is supplementary information to that of the DoD Application Form. It is self-explanatory. Additional instructions are on the form. Ensure you complete this entire document. If you do not know your security clearance, then leave this area blank as Physician Education will complete it for you. List only the ADTs you have completed in the specialty (or the subspecialties) that you are applying for your first choice (and second choice, if applicable) at the bottom of this document.

PGY1 Only Form

Applicants not selected for either their first or second choice for categorical residency training will be required to complete a PGY1 in either Internal Medicine, General Surgery or a Transitional year at an AD location. It is not an option for a USUHS student to do a PGY1 only at a civilian institution. Applicants **are** required to rank **all three** PGY1 specialties for AD programs and should numerically rank the programs in order of interest.

When making a selection of Internal Medicine, General Surgery or Transitional, do not forget you **must** rank order **all** the location preferences below each PGY1 program.

Individuals applying for a pre-selected position at an AD location must indicate which PGY1 program they would like to do. Please rank your preferences. Examples of pre-selected specialties where the applicant has a choice of which PGY1 program they would like to do are Anesthesiology, Radiology, Ophthalmology and Urology. Individuals pre-selected for training will be given a PGY1 at the same location as the specialty training.

USMLE Scores

Physician Education will not accept individual copies of the Step 1 or 2 exam scores. You are required to upload into MODS a copy of the original complete official transcript from the NBME showing all current test dates and scores. You must take the Step 2 no later than **5 September** and upload into MODS the original complete NBME transcript no later than **15 October**. Keep in mind that it may take up to 6 weeks to receive results. **If students fail either step of the exam, they must submit the official NBME transcript with the failed test score and provide the date they are scheduled to retest.** Note: See www.usmle.org for current examination schedules and fees. A GME offer from the JSGMESB is valid until you graduate from medical school. If you are unable to pass Step 2 by graduation you will be placed on an academic leave of absence.

Note: Selection for a full length residency is contingent upon passing Steps 1 and 2.

Program Director/Consultant Interview Sheets

a. This form is not included with this package. Physician Education will provide it to AF Program Directors/Consultants. The intent of the interview sheet is for Program Directors to assess the applicant's qualifications for selection in the requested specialty. Completion of this form is mandatory for all JSGMESB applicants. **Lack of an interview will likely result in non-selection of the specialty regardless of the applicant pool.** Applicants are required to schedule a personal or telephonic interview with the Program Director at the applicant's first AD training location choice. In cases where an applicant is applying for an HPERB approved specialty for which there is no AF Program (Radiation Oncology), the applicant will be required to interview with the AF specialty consultant. This interview requirement includes applicants requesting Civilian Sponsored status as their first choice. However, applicants may interview with multiple programs and the requirement for the interview form will be met when a Program Director/Consultant from any of the AF locations you interview uploads into MODS an interview form.

1. Applicants must list every AD location in which the HPERB has authorized positions for that specialty. This is a requirement even if the applicant only desires civilian sponsorship training. The JSGMESB application will be returned if this requirement is not met.

2. Applicants applying for an HPERB approved Army or Navy Program (as a first location preference), will be required to interview with the respective Program Director from that service.

b. Program Directors/Consultants are not provided a list of applicants to their programs until **1 October**. Therefore, it is the applicant's responsibility to make initial contact with the appropriate Program Director (or Consultant when appropriate) to request an interview. It is highly recommended to schedule this interview as soon as possible. You must interview no later than **10 October** to ensure that the Interview Sheet can be completed and forwarded by the Program Director/Consultant to Physician Education NLT **15 October**.

c. Applicants are required to send a copy of their two-page DoD Application (in Section 3 “DPANE Form 4117”) and CV to each AF Program Director/Consultant in the specialty for which he/she is applying. Providing the 2-page DoD application and CV is extremely important, even if applicants desire to train in a civilian location. Keep in mind; the Program Directors/Consultants are the JSGMESB members who will be selecting individuals for specialty training and location. **Note:** No additional documentation other than these two documents may be provided to (or requested by) Program Directors/Consultants. Do not send other application documents to them, only the two required items. Program Directors/Consultants are aware of this JSGMESB restriction.

d. Contact information for the Program Directors/Consultants is available at: <https://kx.afms.mil/afphysicianeducation> If the applicant has made several attempts to contact the appropriate person and is having difficulty, please contact Physician Education for assistance.

Medical School Performance Evaluation (formerly known as Dean’s Letter)

The official Medical Student Performance Evaluation (MSPE) must be uploaded into MODS by the applicant. Medical School Deans nationally release the official MSPE no later than **1 November** for all medical students. Applicants should ensure that a MSPE is uploaded into MODS for inclusion in the application. This document is extremely important to the JSGMESB application. If you have previously applied to the JSGMESB, you will still be required to submit a copy of the Dean’s Letter as a part of your application package. Members are encouraged to maintain a copy for their personal files for future use and future JSGMESB applications.

Official Copy of Medical School Transcript

The official transcript must be uploaded into MODS by the applicant. Members are responsible for requesting a copy of their transcripts to include in their JSGMESB application package. If you have previously applied to the JSGMESB, you will still be required to submit a copy of the official medical school transcript as a part of your application package. Members are encouraged to maintain a copy of the official final medical school transcript for their personal files for future use and future JSGMESB applications. It is the applicant’s responsibility to make sure the MSPE and medical school transcript have been uploaded into MODS no later than by **7 November**.

Section 3: JSGMESB Application Documents

Note: You must upload into MODS the JSGMESB application with all supporting documents as soon as possible but no later than the deadline of **14 September**. Once the documents are uploaded into MODS, your Physician Education Program Manager can begin processing your application and email a GME checklist to you annotating receipt of your documents. You must complete all the required forms in this section.

1. Remember to print all application documents on one side only. Documents printed on front/back or handwritten will be returned.
2. Ensure your name is listed in the box at the top of the second page of the DoD Application for GME (DPANE Form 4117).
3. Please do not alter or delete sections of the CV. All sections are required, even if it does not apply to you. If a section, such as military spouse, does not apply, please enter N/A.

DEPARTMENT OF DEFENSE APPLICATION FOR GRADUATE MEDICAL EDUCATION (DPANE Form 4117)

THIS FORM IS AFFECTED BY THE PRIVACY ACT OF 1974

1. AUTHORITY: 10 USC 3012.
2. PRINCIPAL PURPOSE(S): To compile information necessary to evaluate an application for military graduate medical education (GME) training.
3. ROUTINE USES: To evaluate application for professional training in military and civilian facilities (**Medical Corps officers only**).
4. MANDATORY OR VOLUNTARY DISCLOSURE: Disclosure of requested information is voluntary, however, without it, consideration for GME cannot be accomplished and GME may not be assured.

24. I understand that the GME training received is directed toward board certification. I am familiar with the training requirements for board certification in the specialty for which I have applied. It is understood that I must enter a program that is accredited and listed in good standing in the most current GME Directory published by the American Medical Association. I understand that I must also meet the requirements to sit for the certification examination by the respective specialty board which is recognized by the American Board of Medical Specialties. For those subspecialties, which do not lead to board certification nor possess accreditation status, training must be received in a program approved by the appropriate specialty society. I understand that my service obligation following GME training will be computed in accordance with applicable Service Regulations and DoD Directives and that I will be made aware of my exact obligation prior to entering GME training. I acknowledge that I understand the contents of this application and I affirm that the information given in this application is true and complete to the best of my knowledge. I am aware that I must submit all supporting documents required by the military Service for which I am assigned for this application to be complete.

MEMORANDUM FOR 2014 JSGMESB

FROM: SQUADRON OR GROUP COMMANDER

SUBJECT: Fitness Statement for Rank Applicant Name

1. _____ is applying to the 2014 JSGMESB for consideration for Graduate Medical Education.
2. The member completed their fitness test on _____ and has a composite score of _____. The member is / is not current in the Air Force fitness program.
3. This paragraph is to be completed only if the applicant's overall fitness category is "Unsatisfactory" with a **score below 75 or if the applicant failed a component.**
 - a. The member is / is not recommended to attend GME
 - b. The member is / is not enrolled in the Fitness Improvement Program.
 - c. Additional comments, if necessary:

4. If the member's fitness status changes prior to entering GME, I will alert AFPC Physician Education and make recommendations accordingly.

2014 Graduate Medical Education - Statement of Understanding (USUHS)

NAME (PRINT) _____

- a) Individuals applying for active duty (AD) training in other than Air Force (AF) medical facilities will be considered for AF or other DoD training programs before being considered for civilian sponsorship. AF members cannot give final acceptance to a program offer until official written notification of final selection for that program is provided by the AF. AF members choosing civilian programs with rotations away from the primary teaching facility may be required to participate in these rotations at their own expense.
- b) I understand if I am selected for and subsequently enter a graduate medical education (GME) program under AF sponsorship, in either a military or civilian facility, I will incur an active duty service commitment (ADSC) for education and training. This ADSC is computed in accordance with AFI 36-2107, *Active Duty Service Commitments*, in effect at the time my training program will commence. I will receive written notification of my selection status and projected ADSC following completion of the Joint Services Graduate Medical Education Selection Board (JSGMESB). I further understand I have a personal responsibility to review and verify my ADSC in accordance with applicable AF Instructions.
- c) I understand and specifically acknowledge that I must possess a current, valid, unrestricted state medical license upon completion of my second postgraduate year (PGY2).
- d) In accordance with AFI 44-102, Section 1.9, I understand that I am prohibited from pursuing off-duty employment (i.e. moonlighting) while in training. AFPC Physician Education has the authority to remove me from training in the event off-duty employment occurs.
- e) If I am selected for training in civilian sponsored status, I will remain on AD under the command/control of AFIT. I am prohibited from receiving a salary, stipend, or other monetary awards, other than my AD entitlements.
- f) I understand, if I am selected by the JSGMESB, I will be required to work in a clinical capacity in the specialty to which I trained for at least two years after GME completion, unless the AF/SG waives this requirement due to the needs of the AF mission.
- g) I understand, if I apply for civilian sponsorship, I am required to enter the civilian match for training (to include length of training) as approved by the JSGMESB.
- h) I must take, pass and obtain the results of Steps 1 and 2 of the USMLE prior to meeting the JSGMESB.
- i) I must apply for an internship (Internal Medicine, General Surgery or a Transitional year) or for a categorical residency program in an AD status.
- j) If I am selected in a categorical training program in an AF medical facility, I will not be required to apply for continued training in the same training program. I further understand that if I am selected for an AD program, I will withdraw from the National Residency Match Program.
- k) I understand I am not eligible for training in a civilian deferred status.
- l) If I am not selected for a full categorical program, I will be given one year of clinical post-graduate training only in Internal Medicine, General Surgery, or a Transitional year. If I do not apply for further training or am not selected for further training, I will be released to the AFPC Physician Utilization Branch for an assignment as a Flight Surgeon or General Medical Officer.
- m) I understand that I must take USMLE Step 3 no later than **11 Mar 2016**.
- n) In the event I am selected for civilian sponsored training, I will only enter or accept training through the NRMP unless approved by the JSGMESB.
- o) I understand that once I have entered training as approved by the JSGMESB, I will be unable to change training locations or specialty training without AF approval. I will contact AFPC Physician Education in the event circumstances (personal or academic) changes occur.
- p) I understand all medical students must obtain their medical degree prior to being authorized to travel to residency training.
- q) I understand that I must contact AFPC Physician Education in the event I am placed on academic notice or probation prior to graduation from medical school or during my GME training or if my GME completion date changes from the JSGMESB approval date.

3. I have applied for a specialty in an AD program that requires a PGY1 (Anesthesia, Ophthalmology, Radiology or Urology) and have ranked my PGY1 choices #1, #2 and #3 (#1 is first choice, #2 second choice and #3 third choice). You must rank all three. **The preliminary year will be at the same location as your specialty training.**
